DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to a micro thermoelectric gas sensor.

Group II, claim(s) 9, drawn to a method for producing a micro thermoelectric gas sensor.

Group III, claim(s) 10-13, 18, and 22, drawn to a method for forming a micropattern.

Group IV, claim(s) 14, 16, 19, and 21, drawn to a gas sensor element.

Group V, claim(s) 15, 17, and 20, drawn to a thermoelectric power generator.

Group VI, claim(s) 23, drawn to a gas sensor element.

Group VII, claim(s) 24, drawn to a thermoelectric power generator.

2. The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: All the groups share the same technical feature of a catalytic pattern on a substrate, however this special technical feature does not offer contribution over the prior art. Shin et al. (US 2003/0056570 A1) discloses a gas sensor with a reactive catalytic film (Fig. 1).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. A telephone call was made to Joseph Scafetta, Jr. on 12/17/2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
